Re: 1260003 – Verizon Generator Radiators Replacement Temple Terrace Center
Tampa, FL

Tony,

Please accept this letter as official notification that our pre-work visual inspection and water test (performed on 10/7/2020) found no signs of water intrusion into the existing roofing system. Likewise, our post-work visual inspection and water test (performed on 12/7/2020) also found no signs of water intrusion into the existing roofing system. With this, we certify that the roofing system (as of 12/7/2020) is in the same watertight condition post-work as it was pre-work.

Sincerely,

Greg Dowdy
Senior Estimator
